

VERMONT NT NATURAL COATINGS™

**Finally, a premium product
that is safe and durable.**

Take polyurethane, make it green and virtually odor free, formulate it so it covers more square feet, then get it to dry quickly so you can lay down three coats in a day. Oh, and make it with a renewable resource from farms instead of imported crude oil. At Vermont Natural Coatings, that's exactly what we did.

You no longer have to choose between a wood finish that is high quality, professional grade and green. Vermont Natural Coatings uses local resources and Vermont craftsmanship to create our premium products. No other products in their class are as safe for the environment and manufactured using environmentally sustainable processes.

**Professional Wood Finish
Made Green.™**

Low-VOC Content

Vermont Natural Coatings ≤ 180 g/L* <small>*grams per liter</small>	Toughest U.S. Standard ≤ 250 g/L

and surpasses LEED Environmental
Quality Credit 4.2**

PolyWhey™ Floor Finish

A clear, durable, sealer and topcoat for new bare wood flooring or previously finished wood floors.

PolyWhey™ Furniture Finish

A clear, durable finish for bare wood or previously coated or stained wood.

Recommended for furniture, trim, cabinets, paneling, tabletops, and doors, as well as craft items.

Professional quality with unprecedented performance...

- Durable, twice the hardness of other waterborne finishes
- Seals and protects against water and chemicals
- Clear finish enhances wood grain
- Can be applied over oil-based stain or finish, as well as other water-based finishes
- Non-yellowing
- Easy, single product application
- More coverage: 500-600 sq. ft. per gallon
- Fast drying – under 2 hours
- Easy cleanup with soap and water

An environmentally safe product made from a sustainable and renewable resource...

- Meets LEED Material Resource Credit 4.1 and surpasses LEED Environmental Quality Credit 4.2
- Indoor VOC levels lower than the strictest U.S. standard
- Safe for humans and pets
- Neutral odor
- Derived from whey, a by-product of cheese making
